40				
41				Esther Townsend carried out a survey over the same area
42				on 6/5/2012 and observed 37 species with 30 the same
43				as were observed on 20/05/2012 but not the:
44				Australian White Ibis,
45				Galah, or
46				Little Corella.
47				The seven species noted by Esther that were not found on
48				20 May were:
49				Australian Wood Duck,
50				Pacific Black Duck,
51				Eastern Great Egret,
52				Red-backed Fairy-wren,
53				Eastern Whipbird, and
54				Rufous Whistler.
55				White-necked Heron
56				(These have been noted in surveys from past years)
57				
58				Esther also clearly identified the call of a Bar-shouldered
59				Dove but it would have been outside the observed area.
60				
<b>Total</b>			33	

'Seq' is a sequence number from the original order of the Christidis & Boyles Order list  
'O' means the species was observed overhead  
'H' means the species, though not sighted, was heard, with specific characteristic call  
'1' in 'Tick' column indicates that at least one bird of the specific species was observed  
Numbers at beginning in 'Comments' column may indicate specific areas for some surveys
