Remnant Vegetation Condition Assessment

Site Name: Date:

Management Unit: Assessor:

Guidelines: In order to answer the questions below, compare the area being assessed to an undisturbed example of the same vegetation type.

Positive Attributes	None (Score 0)	Few/ Bit (Score 1)	Many/ Lots (Score 2)
Range of sizes (heights) of canopy species with evidence of regeneration of new trees			
Number of trees with hollows (including dead trees)			
Variety & Number of understorey / shrub plants (not including canopy species)			
Native Vegetation Growing near ground (vines, grasses, ferns etc)			
Amount of fallen branches, logs and rocks on the ground			
Negative Attributes	None (Score 0)	Few/ Bit (Score -1)	Many/ Lots (Score -2)
Number of different weed species present			
Area covered by weed species			
Area of reduced canopy cover			
Level of human impact (ie tracks, rubbish, vegetation trampling)			
Evidence of soil erosion or disturbance.			

Total Score
